EXPERIENCE

I.T. Supervisor, DICE205 Digital Corporation
MANDALUYONG CITY (REMOTE)   •   AUGUST 2023 - PRESENT

Work involves managing manpower resourcing for new and existing projects, developer onboarding and offboarding, code reviews, training curriculum development, internal library and framework development, hiring management, and performance appraisal evaluation. For new projects, I also provide initial cost estimates and development manhours to guide Sales team costing.

Software Developer, DICE205 Digital Corporation
MANDALUYONG CITY (REMOTE)   •   JUNE 2022 - AUGUST 2023

Work included maintenance and enhancement of existing internal monolithic systems for government agencies. I have also dealt with maintenance of legacy systems and extending their functionality based on emergent business needs. Main technologies are Java and Spring Boot.

Junior Software Developer, SysNet Integrators Inc.
MAKATI CITY   •   JANUARY 2021 - FEBRUARY 2022

Work includes maintaining and enhancing existing internal systems and API endpoints for web-based software, creating server applications with NodeJS and Express, developing Android applications with Java and Jetpack Compose, and working in DevOps to build, scale, and deploy applications based on business needs.
